

BA-1000Pro System

*Sold separately

BA-1000Pro is designed to be used in conjunction with your HVAC system to circulate beneficial bacteria, nourishing your environment and supporting your indoor air quality, with a repetitive flow of Enviro-Biotics™.

BA-1000Pro disperses the Enviro-Biotics™ enhancing your well-being, cleaning your air, surfaces and objects, especially in those hard to reach areas.

WARNING

The BA-1000Pro should only be used with the power pack provided by the manufacturer.

**KEEP OUT OF REACH OF CHILDREN.
AVOID SWALLOWING AND EYE CONTACT.**

**IF SWALLOWED - drink 1-2 glasses of water.
IN CASE OF CONTACT WITH EYES - flush with water.**

CAUTION: Do not place directly under lights or other heat sources over 100 degrees. Damage to the BA-1000Pro may occur.

Quick Start Installation Guide

BA-1000Pro

1000Pro

Pre Installation

Timer Set Up

Plug into power supply. Press the ENT Button for 5 seconds to turn ON/OFF the system.

- Press and hold the two arrow buttons on the right for 5 seconds.
- Use the up arrow to adjust hours / minutes.
- Use the right arrow to shift between hours and minutes.
- Press ENT to save.

Dispersion Rate Set Up

Program 1

Refill will last approximately **6 months**. The BA-1000Pro is pre-programmed for this dispersion rate and is recommended for residential use.

Program 2

Refill will last approximately **3 months**. This dispersion rate is recommended for high traffic areas. To select Program 2, simply press the up arrow once.

Program 3

Refill will last approximately **1 month**. This dispersion rate is recommended for large commercial spaces or residential remediations. To select Program 3, simply press the up arrow twice.

Installation Instructions

Step 1

Using the stickers and screws provided, mount the BA-1000Pro to the wall near the HVAC system and air duct supply.

The wall must be capable of holding a weight up to 50lbs. Unit must be kept in upright position. Do not lay flat or place sideways.

Step 2

Drill a hole in the air supply duct above the air handler and insert the silver tube in the direction of the air flow. Make sure the blue hose is free from knots or obstructions for optimal airflow.

Secure and seal the metal plate to the air duct using HVAC tape.

Step 3

Open the BA-1000Pro to insert the refill bottle. Shake and gently insert the bottle in the vertical position and rotate clockwise until secure.

Step 4

Plug in the BA-1000Pro to the power supply. Once plugged in, the unit will turn on automatically.

The system is now ready to use.

IMPORTANT Always turn power off when removing and replacing the refill bottle.
