- H-** Overboard discharge

**Automatically  
clean air ducts and  
HVAC components**

**Control foul odours  
caused by mold  
or mildew**

# BetterAir

*If it's good for us,  
it's good for our environment.*

We are dedicated to improving quality of life by bringing balance to indoor living and work spaces by replenishing them with beneficial probiotics. Our line of products accommodate any indoor space from small rooms to large-scale boats. BetterAir purifiers are chemical-free, 100% natural and safe for humans and pets.

# BetterAir

the world's first *probiotic*  
air and surface purifier

[www.BetterAirUK.org](http://www.BetterAirUK.org)

Clean starts here.  
Simply with probiotics.

Reduces organic irritants such as *pollen*, *dust mite waste* and *pet dander* on surfaces and inside objects

Automatic and continuous cleaning inside of air ducts and HVAC components

Bad odour control and elimination via continuous probiotic misting

Helps boost natural defenses to protect against indoor irritants that reside on surfaces

Increases longevity of HVAC systems and components

Simple installation. No special infrastructure required.

Energy efficient

# Experience the power of Environmental Probiotics

## What do we do?

We make it simple to protect indoor environments from harmful pollutants and irritants by leveraging the power of *Environmental Probiotics*; comprised of water and *Bacillus ferment*. Our patented technology works on a microscopic level and repetitively releases billions of micron sized probiotics to purify the air and clean surfaces and objects; resulting in a healthy microbiome.

## How Does it Work?

Our purification systems directly tap into existing air ducts and are designed to automatically release probiotics into the air which are carried by air flow throughout the indoor space. The probiotics land on surfaces and penetrate hard to reach objects to consume the resources available to harmful bacteria, essentially starving them.

## What makes us different?

Our systems not only improve air quality, but also eliminate indoor bad odours. The probiotics land on surfaces and consume the resources available to harmful bacteria such as dust mite excrement, pollen, pet dander and shed skin cells. With fewer contaminants on surfaces, less are emitted into the air thus providing fresher and cleaner air.

Our technology is 100% organic, chemical free and environmentally friendly.

## BetterAir's Products & Services:

### BA-MARINE 1200

#### Up to 25,000 sq. ft.

Direct HVAC system installation. Works up to 25,000 sq. ft. per air handler. Fully programmable & customizable.

### BA-FOGGER SERVICE

Fast and effective solution to immediately reduce indoor foul odours. 1-2h fogging service depending on room size

### BA-MARINE 800

#### Up to 800 sq. ft.

Compact plug & play portable unit. Features: Low, Medium, High mode. Cartridge replacement every 60-90 days.

### BA-MARINE 1800

#### Up to 45,000 sq. ft.

Direct HVAC system installation. Works up to 45,000 sq. ft. per air handler. Fully programmable & customizable.
